## OUR STORY

Recore is a sustainable plant based leather brand by Raydan® which has dedicated itself in making fashion industry more sustainable and organic. Recore has range of bio leather collection mainly made out of banana stem fiber, use of high-quality materials and technology has helped us to develop a sustainable material for the industry.

---

## COLLECTIONS

### THE BANARIC

BANARIC is an industrial grade fabric Made out of banana stem fibers which is coated with BIO PU, Banaric is strong durable material ideally made for fashion accessories and bags

### PLANT BASED VEGAN LEATHER

A plant cellulose based fabric which is coated with BIO PU, which has up to 76% of bio mass content.

Ideal for bags and fashion accessories

---

# THE BANARIC

## BIO PU TECHNOLOGY

Bio-PU technology transforms plant waste into eco-friendly polyurethane, reducing reliance on petroleum. It fosters sustainability and minimizes environmental impact.

## BACKING THE BANARIC

Banana fiber industrial fabric technology repurposes banana plant waste into eco-friendly textiles. Extracted fibers are processed and bonded together without weaving, creating a sustainable and versatile material

---

# PLANT BASED VEAGN LEATHER

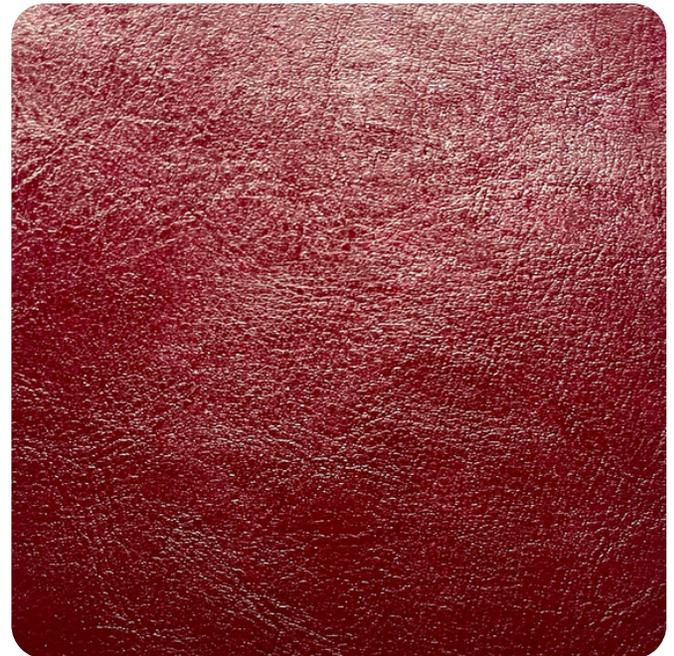

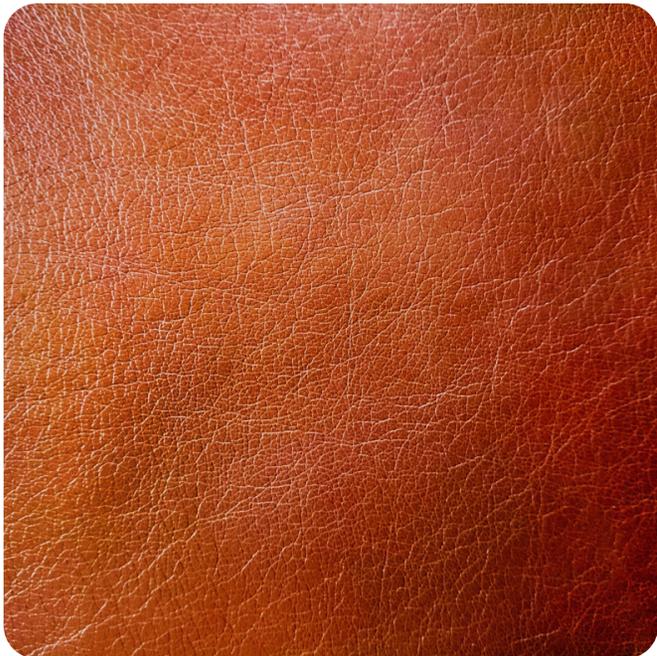

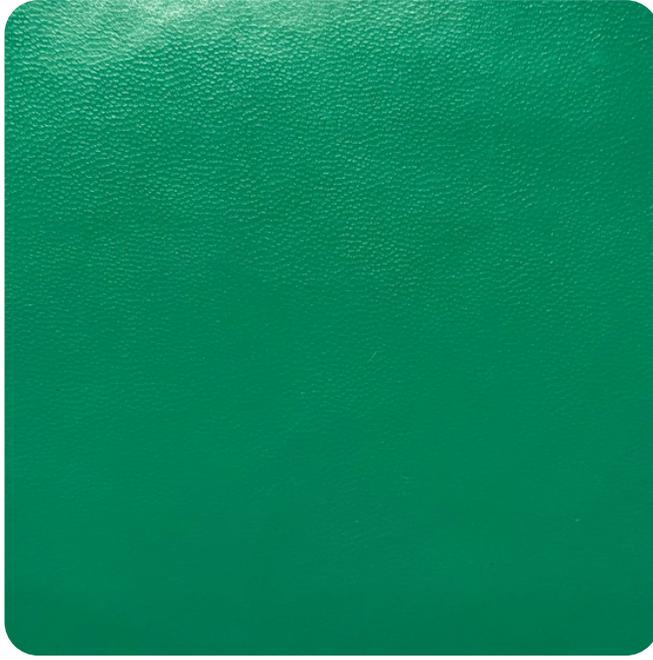

## **BACKING THE PVL**

plant cellulose fabric technology converts plant waste cellulose into eco-friendly textiles. Extracted plant fibers are processed into cellulose followed by spinning and fabric making.
